- pesticides

CHARACTERISTICS

- Peroxide Value:** < 2 mEq O₂/kg
- Free Fatty Acids:** < 2%
- Color:** Light golden-brown
- Taste/Smell:** Savoury turkey
- Density:** 600-700 g/l
- Antioxidants:** BHT, BHA, PG (propyl gallate) and citric acid. Rosemaric extract, δ-tocopherol on demand.

SOURCE AND PROCESS

Processed chilled and fresh turkey (100% pure meat and skins).

ADVANTAGES

EM'TURKO is a turkey meat meal with excellent organoleptic properties especially designed for petfood.

Due to the higher percentage of collagen, EM'TURKO is a very digestible, tasteful and healthy protein source.

PACKAGING

Small bags

Big bags up to 1500 kg.

Keep cool in a dry, dark place.

Shelf life: minimal 9 months from date of manufacture.

TAILOR MADE

On demand of the customer, the composition (protein content up to 75%) could be altered thanks to our flexible production process.
