

EMANATION OF PROTEINS

empro 

PREMIUM PET

FOOD GRADE

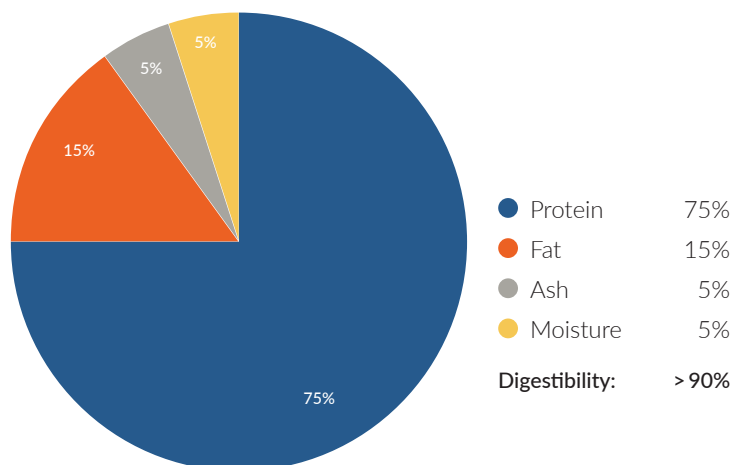

DEDICATED POULTRY

# EM'CRISP

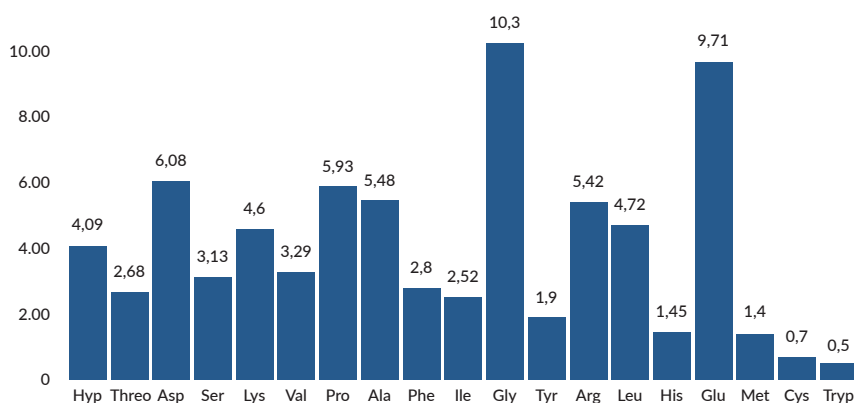

Desiccated poultry

# EM'CRISP

## NUTRIENT COMPOSITION

## AMINO ACID PROFILE (PROTEIN BASED)

## QUALITY ASSURANCE

### Microbiological

- Salmonella: absent in 25 mg
- Enterobacteriaceae: < 10 cfu/g
- Molds: < 100 cfu/g
- S.aureus: absent in 0.1 g

### Free of contaminants such as:

- dioxins/PCB's
- heavy metals
- mycotoxins
- pesticides

## CHARACTERISTICS

Peroxide Value: < 2 mEq O<sub>2</sub>/kg

Free Fatty Acids: < 2%

Color: light brown

Taste/Smell: mild chicken

Density: 600 g/l

Antioxidants: BHT, BHA, PG (propyl gallate) and citric acid. Rosemaric extract,  $\delta$ -tocopherol on demand.

## SOURCE AND PROCESS

Made from fresh foodgrade poultry skin and meat, EM'CRISP is obtained by gently baking and drying of the raw material. The result is an unique dry powder to top up your petfood products.

## ADVANTAGES

EM'CRISP is a poultry protein and flavour source with excellent nutritional and functional properties due to a higher percentage of very digestible protein (high in collagen).

## PACKAGING

Big Bags up to 1500 kg.

20 kg bags.

Keep cool in a dry, dark place.

Shelf life: minimal 9 months from date of manufacture.
